Table 2: Files required for installation of [YEROTH-ERP-3.0](#).

Table ?? illustrates files required for installing [YEROTH-ERP-3.0](#).

4 Installation Procedure

Following steps have to be followed in order to have a well functioning installation of [YEROTH-ERP-3.0](#):

- 1) install OS Debian-buster
- 2) install gdebi and expect software
- 3) install database software mariadb-server and mariadb-client

- 4) configure database software mariadb-server
- 5) install [YEROTH-ERP-3.0](#) (Qt and Texlive are automatically installed).

4.1 Installation of gdebi and expect

- 1) Open a "bash-terminal"
- 2) type following command:

```
apt -y install gdebi expect
```

4.2 Installation of mariadb-server and mariadb-client

- 1) Open a "bash-terminal"
- 2) type following command:

```
apt -y install mariadb-server mariadb-client
```

4.3 Configuration of mariadb-server

- 1) Edit provided file "yeroth-erp-3-0-configure-mysql-server-set-root-pwd.exp" and set mariadb-server "root" password by replacing string "admin1" with a new password
- 2) finally, run provided bash file "yeroth-erp-3-0-configure-mysql-server.sh"

4.4 Installation of Qt, Texlive, and of [YEROTH-ERP-3.0](#)

- 1) Open a "bash-terminal"
- 2) then type following command:

```
gdebi -n yeroth-erp-3.0-standalone.deb
```

This command automatically installs Qt, and Texlive.

- 3) type in mariadb-server "root" (administrative) password when prompted. This is required for setting up database "yeroth_erp_3".

5 Standard Administrative User Account 'admin'

Afer [YEROTH-ERP-3.0](#) successful installation, the application is accessible using a standard administrative user account with the following credentials:

- 1) user name: **admin**
- 2) user password: **admin1**

This administrative user account could be modified at your wish.
