The Application Architecture of YEROTH-ERP-3.0

This document describes the application architecture of ERP software-system YEROTH-ERP-3.0.

1 Introduction

2 Conclusion

Table 1 pictures the 'simplicity' and 'effectiveness' of YEROTH-ERP-3.0, compared to ERP software-systems "Sage Gescom i7", and "SAP Business One".

	Thick-client application	Web-browser-based application
user interface development	WYSIWYG tool	manual coding
user interface deployment	custom thick-gui client	standard web-browser
application architecture	1-tier architecture	multi-tier architecture
graphical user interface widgets	all widgets	some missing widgets

Table 1: Comparison between YEROTH-ERP-3.0 and 2 other full featured ERP software-systems
