YEROTH–ERP–3.0

XAVIER NOUMBISSI NOUNDOU, DIPL.–INF., PH.D. (ABD)

1 Developer Biography

Figure 1: Portrait of Xavier

XAVIER NOUMBISSI NOUNDOU, DIPL.–INF., PH.D. (ABD) is a Cameroonian born on September 16 1983 in DOUALA (LITTORAL region, CAMEROON).

Xavier is a Ph.D. (ABD) in Software Engineering of the **University of Waterloo, Waterloo, Ontario, CANADA** (March 10 2015).

Xavier is a Diplom–Informatiker (DIPL.–INF.) of the **University of Bremen, Bremen, Bremen, GERMANY** (May 25 2007).

2 Introduction

YEROTH–ERP–3.0 is an **Enterprise Resource Planing** (ERP) software–system.

Users of YEROTH–ERP–3.0 could have the following roles:

1) « Administrator »
2) « Business manager »
3) « Cashier »
4) « Seller »
5) « Stock manager »
6) « Storekeeper ».

YEROTH–ERP–3.0 allows for business management tasks listed in Table 1, depending on user role.

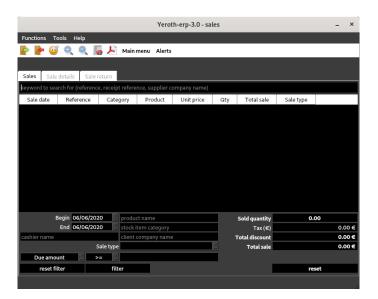

Figure 2: Sale–information window

3 Advantages of YEROTH–ERP–3.0

1) YEROTH–ERP–3.0 is 100% stable
2) YEROTH–ERP–3.0 has an alert system with two types of alerts: alerts based on stock–quantity, and time–period alerts
3) users have the choice between small size receipts, and, bigger size receipts ("A4")
4) YEROTH–ERP–3.0 runs on the Linux operating system, because Linux is stable, performant, and less vulnerable to security breaches in comparison to other operating systems ('Windows 10')
5) YEROTH–ERP–3.0 has an user interface "Sales" to view sale information (Figure 2), and thus enables users to make managerial decisions
6) YEROTH–ERP–3.0 has an interface "Business dashboard" that generates financial accounting reports, from sale and payment information, to help managers to make "business decisions".

4 Alert System

Users with roles « Administrator » or « Business manager » are the ones able to create alerts.

Tasks	« Business manager »	« Seller »	« Stock manager »	« Storekeeper »	« Cashier »
insert stock (or service)	✓		✓		
delete stock	✓				
view stock	✓	✓	✓	✓	✓
modify stock	✓		✓		
transfer stock	✓		✓	✓	
modify stock management strategy (ex.: « FIFO », etc.)	✓	partial	partial		
point–of–sale	✓	✓			✓
view stock transfers	✓		✓	✓	
customer management	✓	✓			
business dashboard	✓				
sale return	✓				
view sales information	✓	partial			

Table 1: YEROTH–ERP–3.0 functions–tasks, and associated users–roles.

YEROTH—ERP—3.0 allows its users to create two types of alerts:

1) alerts over stocks–quantities
2) alerts over time intervals (this helps for perissable articles and for sales discounts over a period of time).

4.1 Alerts over Stock–Quantity

An alert aver a stock–quantity is a message that is sent to a pre–determined user whenever "pre–determined" stock–quantity (X) of a specific article–stock is reached.

For instance, Xavier (« Business manager ») could create an alert for stock "mango" that will be trigerred whenever stock "mango" quantity reaches 100; An alert–message is sent to user John (« Storekeeper »).

4.2 Alerts over Time–Period

A time–period is defined by a starting–date and an ending–date (dates are from the "gregorian" calendar).

An alert aver a time–period (T) is a message that is generated, sent to a pre–determined user, and kept within YEROTH—ERP—3.0 from T's starting–date up to T's ending–date.

For example, an alert with a message has to be sent to Paul (« Cashier ») when the date of May 05th is reached. The alert message specifies that a rebate of 20% has to be applied on every sale of yoghourt 'trèsbon' during a time interval of 2 weeks.

5 Database Management System

YEROTH—ERP—3.0 uses 'MariaDB' as the standard DBMS. 'MariaDB' is very stable, very performant, and free–software.

6 Conclusion

Figure 3 illustrates the window for selling articles.

Figure 4 illustrates the window for viewing and searching for stocks.
